

THE  FORD
IN **LAW**
ENFORCEMENT
SERVICE

"The Ford V-8 is the most satisfactory and economical car for Police work we have ever had. The quick get-away in all gears saves us many a chase by being able to pick up offenders within a block or two.

"The power and roadability of this car enable us to drive hills and curves at high speed. This is a great advantage, as Ashland is located near the mountains."

C. P. TALENT,
Chief of Police
Ashland, Oregon

"The Ford V-8 has been driven over 20,000 miles and proven itself to be a dependable, safe and economical part of our Police equipment. It has proven its economy beyond expectation, on duty 24 hours a day."

JOHN T. HOLLAND,
Marshall, Maumee, Ohio

"We have used Ford cars in our patrol for several years. I believe they have been the best equipment we could have bought. They are fast, easy to operate, economical to run."

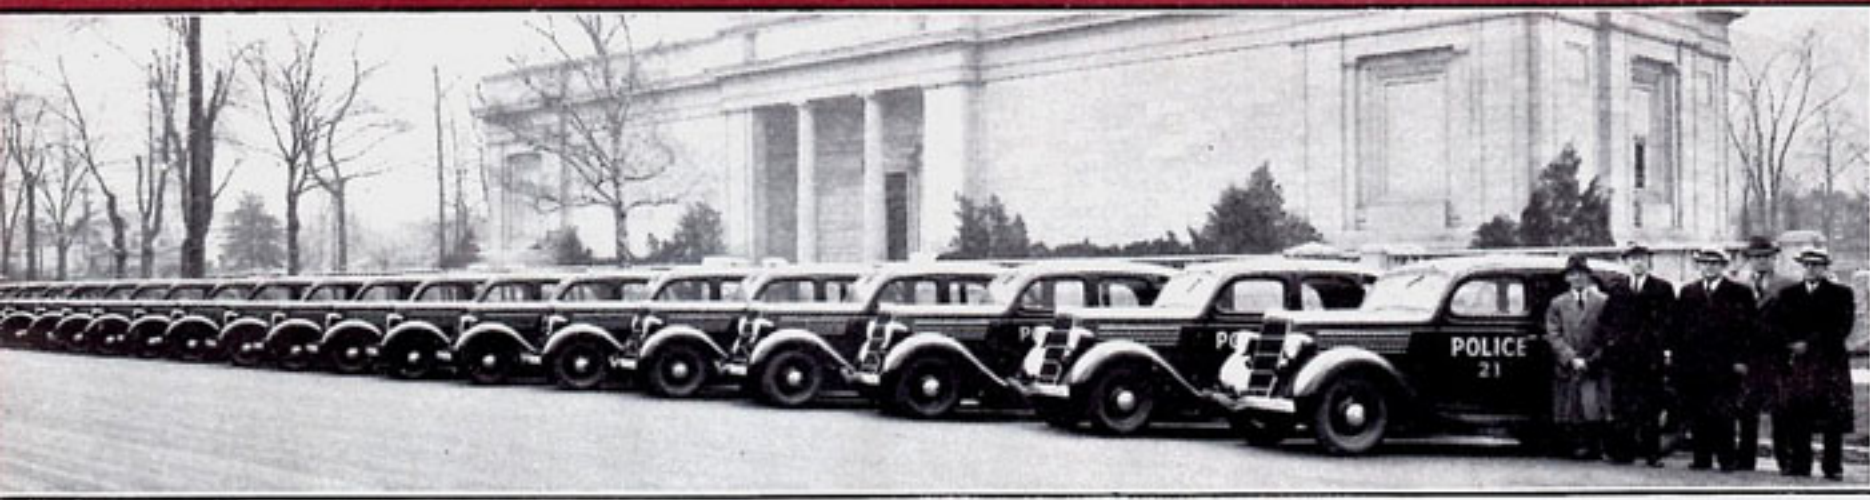

DANIEL G. TORRISI, Chief
of Police, Beloit, Wisconsin

"We wish to take this opportunity to commend the Ford V-8 for Police work. We have been using Ford cars for the past eight years. Comparing all-around service and economy of operation, the Ford V-8 stands at the top of the list.

"Our cars are in service nearly 24 hours a day. We find that the amount of time they are in the garage for service is far below the average."

H. W. LANSTRA,
Chief of Police
St. Clair Shore

THE FORD V-8 MEETS EVERY NEED

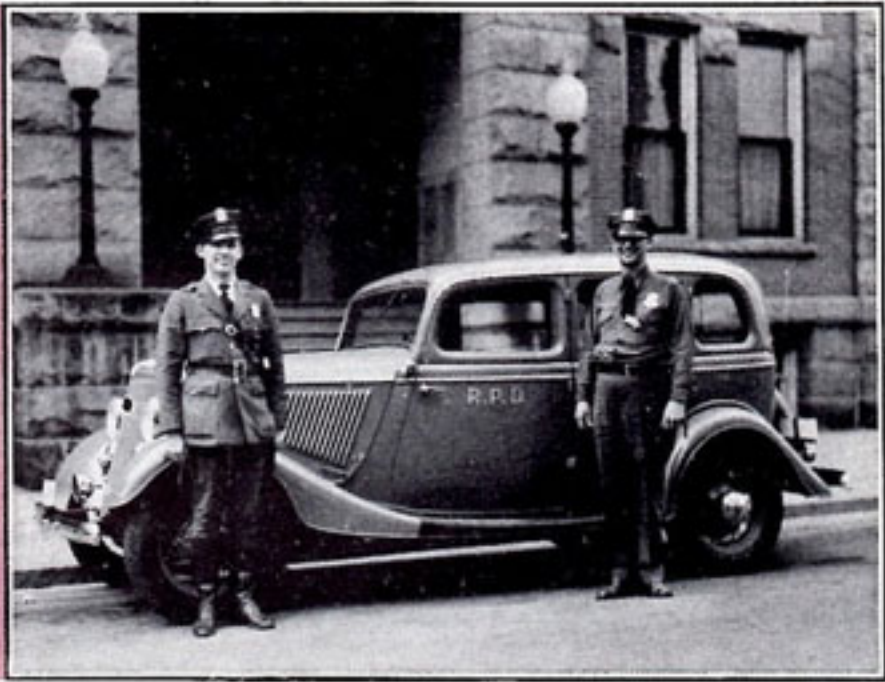

30 FORD V-8 SEDANS ENLARGE LOUISVILLE'S RADIO PATROL

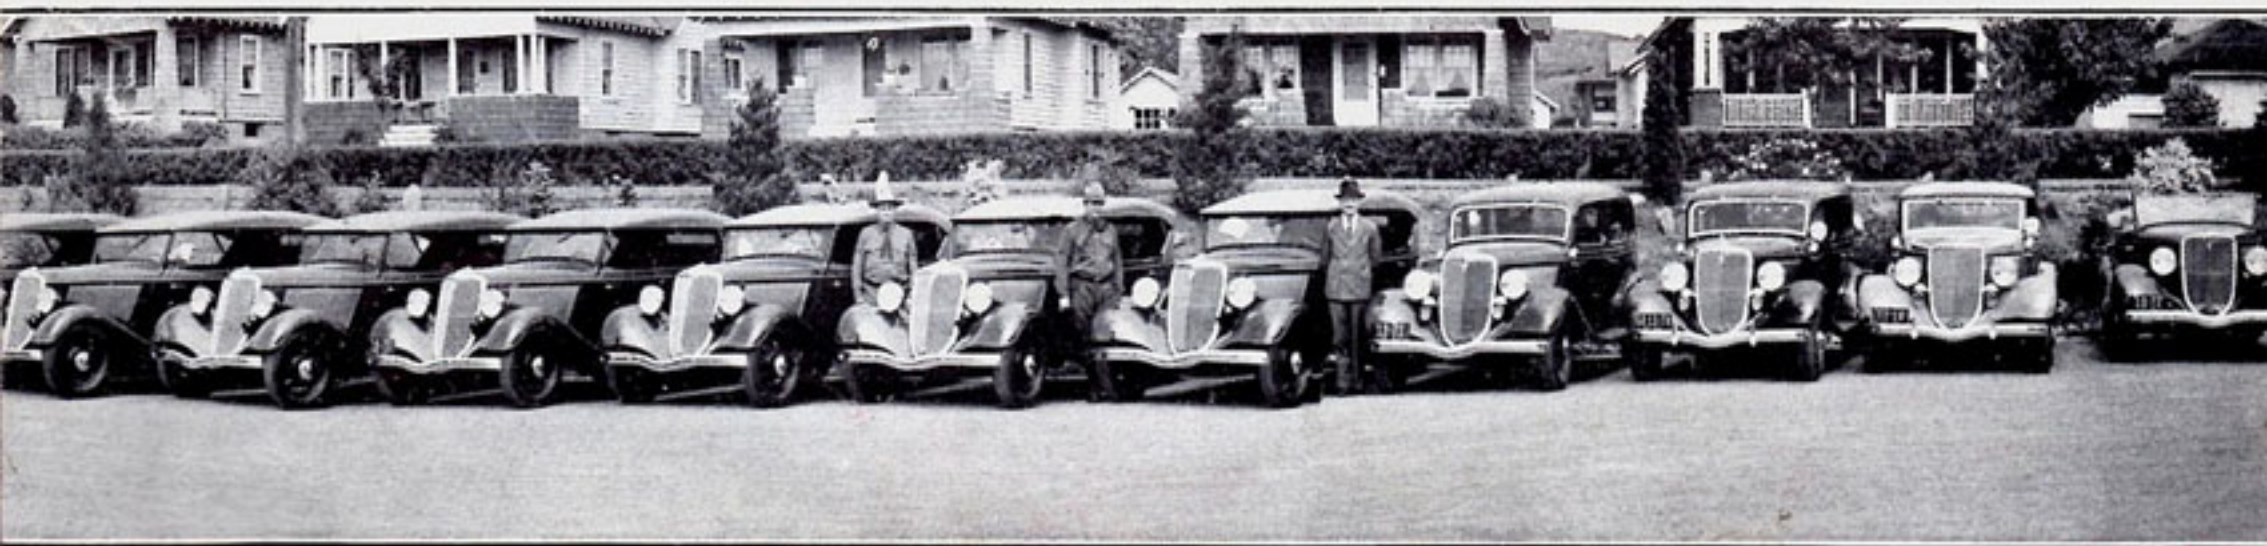

Attractive 1935 units will make a strong team with the progressive police of the Kentucky metropolis. Speed, safety, quick get-away are big factors in these new Ford V-8 cars.
