Presenting a limited edition Lincoln Continental.  
The Town Car.

This March, a very special car joins the Continentals: The 1972 Town Car, our most civilized Lincoln Continental. A car which offers an extraordinary degree of personal comfort. A car which will be produced in limited quantity.

The interior is in luxurious beige or black Lamont cloth (or if you prefer, at additional cost, you may order beige or black leather accented with vinyl). Carpeting is long-sheer, 25 ounce cut-pile nylon.

Assist straps are provided in the rear compartment. Also reading lamps, with individual controls at your fingertips.

The luggage compartment is luxuriously carpeted. The spare tire as well.

Power retracting vent windows are introduced exclusively on this car. Touch a switch, the vent opens. When completely open, the main window starts to move down. Vent windows travel up or down, allow rapid and quiet change of inside air.

Nameplates on each front fender and the rear deck lid identify it as the Town Car. Your initials, furnished on sculptured letters, to be mounted on the

front doors, identify it as your very own. Also, your own silver-plated keys.

The Lincoln Continental Town Car has the widest track the land—and all the stability that goes with it.

Premium grade radial-tires are standard. As are power steering, power front disc brakes and automatic transmission. And Sure-Track, America's first computer-controlled anti-skid braking, is available.

You may order the Town Car in any of 15 colors, as well as 8 optional Moondust metallic colors.

The Town Car. New and most formal Lincoln Continental sedan. The final step

Wheel covers and color stripes are optional.
