

WHY YOU'LL WANT IT

Whirlaway

FOR PASSING!

When passing on the highway, WHIRLAWAY gets you around other cars more easily, back into the right hand lane more quickly.

Whirlaway

FOR HILLS!

Climbing hills, and driving in mountains, WHIRLAWAY gives you the accelerating power to make better time, more safely, with less effort.

Whirlaway

FOR SAFETY!

WHIRLAWAY provides a "safety reserve" of power that's invaluable when a quick burst of pick-up is needed to whisk you out of danger.

Whirlaway

FOR THRILLS!

Wherever you may travel—city or country—Hydra-Matic Drive's WHIRLAWAY feature makes your trip more enjoyable—more thrilling!

OLDSMOBILE

WHAT Whirlaway IS!

When you drive a Hydra-Matic Oldsmobile, you have something *extra* at your command . . . a *plus*-performance feature that's a great asset for safer, more enjoyable motoring. WHIRLAWAY is what engineers call it, because "WHIRLAWAY" is what it does for the performance of your car!

Technically, WHIRLAWAY is a special downshift that puts you—automatically—into a lower gear ratio when you need maximum acceleration and performance. But to the driver, WHIRLAWAY is a new "sensation"—a thrilling, new feeling of power and pick-up that's instantly available at your command.

WHAT Whirlaway DOES!

WHIRLAWAY gives you extra power . . . extra pick-up . . . extra speed . . . *when you need it*. Just step all the way down on the accelerator, any time you're cruising along at a speed under 55 miles per hour, and WHIRLAWAY goes into action. Instantly, automatically, you shoot ahead as if you were jet-propelled! Speeding out of danger! Sweeping up a hill! Swinging out ahead of traffic! Then, when you let up on the accelerator, or reach a speed of 68 miles per hour, you automatically return to Hydra-Matic Drive's economical, fourth-speed cruising range.

HOW TO USE Whirlaway

... FOR SAFETY AND GREATER PERFORMANCE

WHIRLAWAY is simplicity itself in operation. All you do, when you need extra pick-up, is the perfectly natural motion of "stepping on the gas." You don't shift gears . . . don't push a clutch . . . just step down quickly on the accelerator, *all the way to the floor*. The rest is *automatic!*

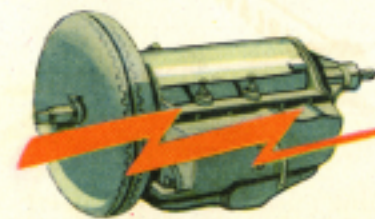

1 Imagine you are breezing along a highway like this . . .

2 Suddenly, for safety's sake, you need a burst of acceleration . . .

3 All you do is step on the gas, all the way to the floor . . .

4 Instantly, automatically, WHIRLAWAY responds . . .

5 Shooting you ahead with a "Futuramic" surge of pick-up!
