The Oldsmobile RECON was designed to deliver on Oldsmobile's promise of refined and innovative vehicles that inspire confidence through Sophisticated Design and Driving Control

### **RECONnect . . . RECONfigure**

- **Open-air Driving Experience**

The two panel power sunroof extends over both front and rear seats which reconnects passengers to the world in a safe environment.

- **Driver Control Technologies**

Intuitive fingertip controls on the steering wheel control access to information and entertainment on the reconfigurable cluster display. Get reconnected to your Personal Digital Assistant, Internet, Cell phone, Traffic/route information and Entertainment libraries.

- **Rear Compartment Flexibility**

Reconfigure the rear seating area to business class roominess or additional luggage space. Fold the seats for cargo carrying. Reconfigure the rear console into an entertainment system.

- **Safety and Security**

Smart Trac II and the Michelin PAX extended mobility tire system conspire to give the driver a tremendous sense of control and security. In case of a puncture the PAX tire system provides increased safety. Additionally, improved fuel economy, increased control and sporty appearance are extra benefits that build Driving Confidence.

**RECONsider**
