

1998

H o n d a

Even when you buy a new car, you don't always know what you're getting into. Unless, of course, you're getting into a Honda. Then, there are certain things you know for sure. Like Honda's long history of building quality vehicles that are reliable, fun to drive and fuel-efficient. But what you might not know is, the Honda lineup is as diverse as ever. With nine exciting bodystyles to choose from. Including the all-new, more powerful Accord and Passport. Whether you set your sights on a car, SUV or minivan, you'll find it at your Honda dealer. What else do you need to know?

[Accord Sedan]

It's an Accord like no other. With advanced engineering and tasteful luxury, it commands your attention. It offers one of the most powerful V-6 engines in its class. Or a 4-cylinder engine that meets California's strict Low-Emission Vehicle (LEV) standard. And has a more spacious cabin to comfortably carry passengers. Subtle elegance. An inviting interior. And a drive that invigorates. Welcome to what will surely become the latest in a long line of legendary Hondas. The 1998 Accord.

The Accord's 200-Horsepower V-6 Engine is available on both the LX and EX models.

An 8-Way, Power-Adjustable Driver's Seat[†] on the LX V-6 and EX V-6 models ensures that your comfort is maintained while on the road.

Accord EX V-6 Sedan shown in Heather Mist Metallic.

[Accord interior]

The Accord is more spacious and comfortable than ever before. How much more? Well, imagine if you will, relaxing in an oversized seat that is wrapped luxuriously in soft, subtle leather (EX V-6). Experiencing a sense of openness from the abundant head, leg and body room. While large, easy-to-read gauges peer out at you from a beautifully designed dash. And, available luxuries like wood-grain trim, a leather-wrapped steering wheel and power moonroof take you and the Accord to new heights.

Beverage Holders abound, including two in the rear seat armrest (LX, EX).

Enjoy the luxury of power everything: windows, door locks, even side mirrors (LX, EX). And, of course, controls are perfectly placed.

Accord EXV-6 Sedan interior shown in Ivory leather trim.

[Accord Coupe]

If a car could be thought of as fashion-conscious, it would be the Accord Coupe. It has a distinctive style of its own. Sleek, sophisticated and quite elegant. Yet it conceals one of the most powerful V-6 engines in its class. An impressive 200-horsepower, 3.0 liter VTEC engine, to be exact. There's roomy, comfortable seating. Thoughtful amenities. Luxurious details. And superior ergonomics. It's the kind of thinking that makes the 1998 Accord Coupe as exhilarating to drive as it is to look at.

A Sunglasses Holder is built right into the headliner. Because you spend enough time looking for your keys.

Steering wheel-mounted audio controls on the EX V-6 let you keep your hands on the wheel while adjusting your stereo.

Accord EX V-6 Coupe shown in Flamenco Black Pearl.

[Civic Sedan]

Imagine what it would be like to be in total control. Imagine being behind the wheel of a Civic Sedan. In full command of a high-performance, 127-horsepower VTEC engine (EX). Surrounded by sleek, refined styling while enjoying a smooth, responsive ride. Your world may get out of control, but inside your Civic you'll find its ergonomic design and spaciousness quite comforting. As will knowing the Civic has a reputation for quality and reliability. Take control. Take the wheel of a Civic.

Inside the Civic, seats are wrapped in attractive, durable fabrics. An abundance of legroom and an adjustable steering column let you settle in quite comfortably. While sound-dampening materials keep outside noise where it belongs. Outside.

Civic EX Sedan shown in Cyclone Blue Metallic.

[Civic Coupe]

Drive the sporty Civic Coupe and you'll notice everything around you falls into place. And why not? Its sleek curves appeal to your sense of style. A well-appointed cabin gratifies your desire for luxury. The refined, crisp-shifting 5-speed manual transmission pleases the driver in you. While the Civic's fuel efficiency* satisfies your economical side. And, the quiet that surrounds you lets you calmly revel in your very smart, yet self-indulging, decision to drive a Civic Coupe.

Satisfy your thirst with your choice of four convenient Beverage Holders. Two of which can hold 32-ounce cups.

The Remote Entry System, standard on the EX, lets you lock and unlock doors from up to 50 feet away.

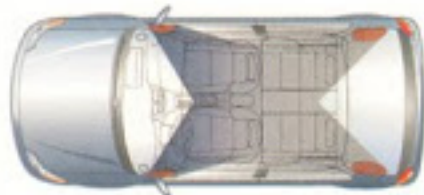

Civic EX Coupe shown in Milano Red with accessory alloy wheels.

[Civic Hatchback]

The Civic Hatchback can be added to that list of life's simple pleasures. It's fun to drive. The interior is roomy, comfortable and perfectly planned. You'll find amenities like front beverage holders and reclining front seatbacks. Then, there's the easy-open hatch. Inside, there's plenty of space to hold whatever you need for work. Or play. And, because its 16-valve, fuel-injected engine is highly fuel-efficient,* going off to play couldn't be easier. The versatility of a hatchback. The reliability of a Civic. It's simple.

The 50/50 Split Fold-Down Rear Seatback gives you lots of extra cargo space.

An impressive High-Power Stereo with four speakers and a clock comes standard on the Civic DX Hatchback.

Civic DX Hatchback shown in Vogue Silver Metallic.

[P r e l u d e]

The thrilling sensation of the Prelude's 195-horsepower VTEC engine is matched only by its unparalleled precision. On the cutting edge of advanced automotive technology, it's one of the hottest-performing sports coupes in its class. From a Sequential SportShift to Honda's unique Active Torque Transfer System, it truly is a driver's car. Power. Sophistication. Refinement. All in a sleek, aggressive package. The Prelude is and always has been the technological showcase for Honda engineering.

The Prelude's Sequential SportShift is modeled after the sequential shifter found in Honda-powered race cars.

The Active Torque Transfer System minimizes understeer and helps the Prelude SH track tight through curves.

Prelude Type SH shown in San Marino Red.

[O d y s s e y]

What drives like a car? Handles like a car? Has four doors and power windows like a car? But is not a car? It's not a riddle—it's the Odyssey. With everything you like about a car. And everything you like about a minivan. In particular, plenty of room. And more important, plenty of options. Like seating for six or even seven (LX), if you prefer. There's a bench seat that folds forward (LX), one that folds into the floor and bucket seats that can be easily removed. Too bad everything in life isn't this accommodating.

A Retractable Third-Row Bench Seat folds away neatly and easily to make room for cargo. Or the family pet.

Six Beverage Holders can carry a variety of cup sizes. And, to every parent's delight, that includes juice boxes, too.

Odyssey EX shown in Crystal Blue Metallic with accessory roof rack.

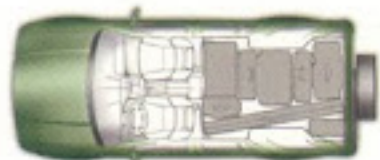

[P a s s p o r t]

Take a close look at the all-new Passport and you might see the future. Yours. Its ruggedly handsome body is hard to resist. In the cabin, luxury abounds. Under the hood, you'll find one of the most powerful V-6 engines in its class. To take you where you want to go, fast.² And, with shift-on-the-fly 4WD, that could be most anywhere you imagine. It's the perfect balance between raw aggression and quiet elegance. Whether your adventurous soul takes you to a mountain or Manhattan, the Passport is ready.

*Get going and keep on going.
With Shift-on-the-Fly 4WD,
you don't have to stop to
change from 2WD to 4WD.*

*A 60/40 Split Fold-Down
Rear Seatback is great for
packing and traveling
because it offers options.*

Passport 4WD EX shown in Bright Silver Metallic.

[C R - V]

Life isn't always a picnic. Well, it could be if you were behind the wheel of an exciting four-wheel-drive CR-V. Because it's just as much fun to drive on city streets as it is on back country roads. There's so much space, you can actually walk between the front seats to the rear seat. And, it has innovative features like Real Time™ 4WD, 12-volt power outlets and a removable picnic table. (An absolute must.) It's reliable. Versatile. And, dare we say, practical. Inside the CR-V, life is good.

The Rear Storage Well found under the removable picnic table can be used for carrying both wet and dry items.

Real Time™ 4WD automatically engages when the CR-V encounters slippery road conditions.

CR-V 4WD LX shown in Supermarine Blue Pearl with accessory alloy wheels and roof rack.

[s a f e t y]

A vehicle is many things. It can be transportation. A hard-working partner. Even serve as a personal statement. Whatever function it has, it must provide protection for the driver and passengers.

Honda vehicles have multiple safety features that work together to help provide a high level of protection. The bodies are reinforced, then welded

robotically to increase their strength. Built-in front and rear crush zones and steel door beams help to protect by absorbing energy in an impact. Inside our vehicles, primary protection is provided by 3-point seat belts, found at all outboard seating positions, and dual airbags[†], which serve as supplemental protection. Every Honda also has energy-absorbing bumpers,

Honda vehicles are built so their components and systems work together to provide a cell of safety around you.

Crush Zones help to provide protection in severe full-frontal, offset-frontal and rear impacts. Sturdy steel door beams, strengthened roof pillars and side sills help provide protection in a side impact. Inside, 3-point seat belts and dual airbags also help provide protection.

Honda's Anti-Lock Braking System (ABS) helps the driver retain steering control during hard braking, especially on slippery surfaces.

adjustable front-seat head restraints and a collapsible steering column that help to provide protection in impacts, whether large or small.

Some safety features, such as rack-and-pinion steering, help to provide enhanced control of the vehicle. Toward this goal, Honda engines are powerful and responsive to help you merge with traffic. Our vehicles use a refined double wishbone suspension system that helps give stability and control in evasive maneuvers. Vented front disc brakes help provide sure, fade-resistant stopping power. Child-proof rear door locks, found on all 4-door models, are standard. And a large windshield and bright, powerful, halogen headlights help you clearly see the road ahead.

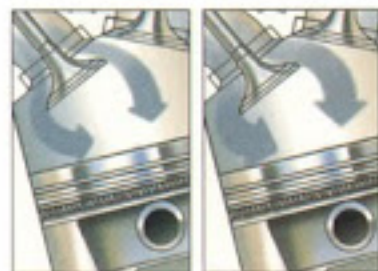

[e n g i n e e r i n g]

Honda is an engineering company devoted to building the most technologically advanced vehicles possible. That's one of the reasons we compete in Indy car racing. We find it helps train our engineers, so they can build better engines and vehicles for you.

All Honda engines have an aluminum-alloy block, cylinder head and pistons to reduce weight. A forged-steel crankshaft and connecting rods increase their strength and durability. A sophisticated multi-point fuel-injection system, 4 valves per cylinder and a high-energy electronic ignition system help make

our engines powerful, fuel-efficient* and reliable. Many Honda engines, including the Accord's new, built-in-America, 200-hp, 3.0 liter V-6, have VTEC (variable valve timing and lift electronic control). VTEC varies the valves' lift, timing and duration. This allows the engine to generate good low- and mid-rpm torque, plus make high-rpm horsepower, all while remaining extremely fuel-efficient.*

VTEC switches between two camshaft profiles to deliver increased power and torque at all engine speeds.

*Four Valves Per Cylinder can flow more air and fuel, which helps the engine deliver maximum fuel efficiency.**

TARGET
Energy

The Continuously Variable Transmission (CVT) provides shift-free convenience with manual transmission-like acceleration.

But we don't only make great engines. All Honda vehicles sport a double wishbone suspension, which provides precise handling. Our vehicles also have durable transmissions, ranging from smooth-shifting 5-speed manuals to an innovative CVT (available on the Civic HX Coupe) and refined 4-speed automatics with Grade Logic Control. This computer-controlled program automatically shifts the transmission to provide more driving comfort and vehicle control when driving uphill or down. And all our vehicles benefit from legendary Honda reliability, dependability and outstanding build quality.

[t h e e n v i r o n m e n t a l c h a l l e n g e]

For more than two decades, Honda has led the way in the development and application of automotive technology that will efficiently reduce pollution. This commitment to the environment has made Honda cars some of the cleanest on the road today.

The Honda Civic CVCC was the first car to meet Clean Air Act standards without the use of a

catalytic converter. Honda also introduced the first gasoline-powered vehicles to meet the very strict Low-Emission Vehicle (LEV) standard of California. The 1996 Civic LX, DX and CX.

The California LEV standard calls for 70% lower emissions of non-methane organic gases (the main ingredient in smog) than the federal standard. This year, we are voluntarily making this advanced low-emission technology available in all 50 states. In fact, over 60% of all Accords and Civics that are sold in America will meet the LEV standard.

The zero-emission Honda EV PLUS,SM an environmental breakthrough, is clean, quiet and fun to drive. It's been designed to meet the practical needs of everyday driving. It can take you and three friends comfortably into the future. And back again.

In California and several northeastern states, we'll introduce the cleanest gasoline-powered production car sold in the U.S. The 1998 ultra-low emission Accord, which meets California's ULEV standard.

Yes, incredible strides have been made. But we believe alternative sources of power still need to be explored. The natural gas-powered Civic GX², the cleanest internal combustion car in the world, will be available soon. And here now is our zero-emission electric car. The EV PLUS.³

Our goal is to continue to balance our customer's desire for performance with society's need for less pollution. And while the technology to achieve this may change, our commitment never will.

With every new Honda comes a reputation for quality. Reliability. And a 3-year/36,000-mile limited warranty.** Which also covers any Genuine Honda Accessories you add to your new vehicle at the time of purchase. And, there's no one better to install them than your dealer's Honda-trained technicians. Their knowledge, expertise, and the fact they use Genuine Honda Parts, also make them ideal for routine maintenance. Why trust your Honda to anyone else?

For more information about our warranty, products, or to request a specific brochure, call us at 1-800-33-HONDA. Or visit your local Honda dealer. Either way, be sure to check out our award-winning interactive Web site at www.honda.com. We look forward to hearing from you. In more ways than one.

[t h e H o n d a w a y]

It has always been our philosophy to build vehicles of the highest quality that can offer superior fuel economy without sacrificing performance. And, to build them in the countries where they are sold. Today, Honda builds 630,000 cars a year in America.

However, our commitment to your satisfaction extends even further. Right to your dealer's door. Where you'll find knowledgeable people dedicated to giving you unsurpassed service. And a feeling of teamwork that originates at our plants in Ohio. Today, over 16,000 men and women work together to design, develop and manufacture the best Honda possible.

Whether you want to own or lease a new Honda, your dealer is there to answer your questions. As is the American Honda Finance Corporation. They can assist you with finding just the right finance option that will fit your needs.

It is our mission to make owning a Honda as rewarding as driving one. Since it seems people come back to Honda time and time again, you could say, "mission accomplished."

Our Vehicle Service Contract offers you 24-hour roadside assistance and freedom from costly repairs. Ask your dealer for all the details.

80% of all Hondas sold in the United States are built in North America.
